

**Hello**  
**Uday surya**

## PROFESSIONAL SUMMARY

Senior Data Scientist with 6+ years of experience designing machine learning solutions, predictive analytics models, and AI-driven decision systems. Experienced in statistical analysis, deep learning, natural language processing (NLP), computer vision, and large-scale data processing. Skilled in deploying machine learning models into production using Python, FastAPI, Docker, and cloud platforms. Passionate about transforming business problems into data-driven solutions using modern AI and machine learning technologies.

## TECHNICAL SKILLS

Programming Languages

Python • SQL • R • Scala

Machine Learning

Scikit-learn • XGBoost • LightGBM • TensorFlow • PyTorch • CatBoost

Artificial Intelligence

Natural Language Processing (NLP) • Computer Vision • Large Language Models (LLMs) • Prompt Engineering • Hugging Face Transformers • OpenAI API • Feature Engineering

Data Engineering

Pandas • NumPy • Apache Spark • Dask • Airflow

Visualization

Power BI • Tableau • Matplotlib • Plotly • Seaborn

Databases

PostgreSQL • SQL Server • MongoDB • Redis

Cloud & MLOps

Azure Machine Learning • Azure OpenAI • Azure Blob Storage • Docker • Kubernetes • MLflow • GitHub Actions

Tools Git • Jupyter Notebook • VS Code • Postman

## PROFESSIONAL EXPERIENCE

Senior Data Scientist

Jan 2022 – Present

- Built machine learning models for customer churn prediction, fraud detection, and demand forecasting.
- Developed NLP solutions for document classification, sentiment analysis, and intelligent search.
- Fine-tuned transformer-based language models for enterprise document understanding.
- Built recommendation systems using collaborative filtering and embedding-based similarity.
- Deployed machine learning models as scalable REST APIs using FastAPI and Docker.
- Automated ML training pipelines using Azure Machine Learning and MLflow.
- Collaborated with software engineering teams to integrate AI models into production applications.
- Reduced model inference latency through optimization and efficient deployment strategies.
- Built dashboards to monitor model performance, drift detection, and prediction accuracy.

## PROJECTS

Customer Intelligence Platform

- Developed customer segmentation and churn prediction models improving customer retention.

Technologies:

Python, Scikit-learn, PostgreSQL, Azure Machine Learning

---

Document Intelligence System

- Built an NLP platform capable of extracting insights from thousands of enterprise documents.

Technologies:

OpenAI API, Hugging Face, FastAPI, Azure OpenAI

---

## Recommendation Engine

- Developed a personalized recommendation engine using embedding-based similarity and collaborative filtering.

### Technologies:

Python, TensorFlow, PostgreSQL, Redis

## Education

MONTH 2014 - MONTH 2018

**JNTUH**

Master of Technology

Artificial Intelligence and Data Science

## CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (AI-900)

Microsoft Certified: Azure Data Scientist Associate (DP-100)

TensorFlow Developer Certificate

Deep Learning Specialization – DeepLearning.AI
